

## **OFS Launches New TrueM2™ 6kW Beam Combiner at Laser World of Photonics**

**Norcross, Georgia. 18 June 2015** - OFS, a leading designer, manufacturer, and supplier of innovative fiber optic products will showcase its new 6x1 TrueM2-14 beam combiner at the Laser World of Photonics Exposition being held in Munich, Germany from 22 through 25 June 2015.

OFS continues to develop the TrueM2 platform enabling machine manufacturers to build their own fiber laser sources using modular architecture producing customized fiber lasers based on unique application requirements. The new 6x1 TrueM2-14 combiner can be mated up to six TrueMode-kW laser cavity modules, or other compatible modules, and is rated to 6 kW.

Dr. David Douglass, OFS Product Manager, states, "With our newest TrueM2 6kW combiner and TrueMode-kW cavity, OFS is leading the march in achieving the high power levels demanded by the market." Dr. Douglass continues, "moreover, as OFS adds to our suite of fiber laser 'building blocks,' customers have even greater laser design freedom. This 'building block' approach enables OFS to provide easily integrated modules while maintaining leading edge performance."

For more information on these and other OFS products, stop by the OFS Stand #B3.449 at Laser World of Photonics or visit [www.ofsoptics.com](http://www.ofsoptics.com).

### **About OFS**

OFS is a world-leading designer, manufacturer and provider of optical fiber, fiber optic cable, connectivity, fiber-to-the-subscriber (FTTX) and specialty photonics products. We provide reliable, cost-effective solutions for a broad range of applications including telecommunications, medicine, industrial automation, sensing, government, aerospace and defense. These products help our customers meet the needs of consumers and businesses, both today and into the future.

Headquartered in Norcross (near Atlanta) Georgia, U.S.A., OFS is a global provider with facilities in China, Denmark, Germany, Russia and the United States. OFS is part of Furukawa Electric Company, a multi-billion dollar leader in optical communications.
